

# A level Reforms: Practical Tips on How to Prepare

Hosted by Brix Learning

## Overview:

Calling all **A level maths teachers**...

There is an overwhelming amount of information available about the new Maths A level syllabus. Everyone is talking about the “overarching themes”, the “change in focus” and the “emphasis on problem solving”. But what does that actually mean? **At Brix’s TeachMeet, we want to talk about practicalities.**

## Aims:

Our event will include:

- Practical tips on how to approach the new material, including **handling large data sets**
- Hearing from colleagues, who will give short talks on **how to teach problem-solving skills**
- An independent **comparison of the different exam boards** and what each one can offer
- Comparing **old and new style exam questions**, and considering how this will impact classroom teaching
- Exploring how **technology** like Brix Learning can help smooth the transition and support students

We want to promote an interactive session, with plenty of time for discussion and sharing of ideas. In particular, **we’re looking for volunteers** to talk for 2 to 5 minute on their ideas for teaching problem solving so get in touch if you’re interested!

## Context:

Brix Learning is a specialist EdTech company, which uses machine learning to streamline A level maths homework and revision. We’re running this event because we want to help teachers prepare for the coming changes.

## Cost

This is a **free event**, and refreshments will be provided throughout the session. Places are limited so make sure you **reserve a place!**

If you’d like to give a short talk, or have any questions, [please email anda@brixlearning.com](mailto:anda@brixlearning.com)
